**Subject:** RE: Bridgeton Landfill

Darcy, originally my inclination was to require a shorter time frame to install the candlestick flares (i.e. July 31, 2013). My thought was Preconstruction waiver is turned around 1-2 weeks, flares ordered and received within 6-8 weeks, flares installed within 1 month. I spoke with Michele Boussad, Weaver Boos Consultant to Bridgeton, and she said that this is attainable if there are no glitches along the way. Then they would have to ask for another extension if something did happen. It may be just as well, to work with the schedule they requested. I do like the fact Kathrina mentioned that if the untested enclosed flare operates beyond their requested date that the Department may cite a violation.

Thank You  
Clifford Johnson
